

## Night dimming function

We offer night dimming function as an option on most fixtures in our exterior range.

Choose one of the following scenarios:

Scenario 1:

From 9.00 pm the effect is reduced to 70%  
From 12.00 midnight the effect is reduced to 50%  
From 4.00 am the effect increases to 70%  
From 6.00 am the effect increases to 100%

Scenario 2:

From 9.00 pm the effect is reduced to 50%  
From 5.00 am the effect increases to 100%

Scenario 3:

From 12.00 midnight the effect is reduced to 50%  
From 6.00 am the effect increases to 100%

Scenario 4:

From 11.00 pm the effect is reduced to 66%  
From 05.00 am the effect increases to 100%

Observe the following:

The driver has no built-in clock, but calculates the time based on time intervals between the lights going on and off. After 3 on-off cycles the driver adjusts itself to the pre-programmed schedule.

In addition to our standard scenarios the integrated Dynadimmer enables dimming in 5 steps. 5 different light levels in 5 time intervals. Pricing supplied upon request.
