

Ateljé Lyktan AB EuP-information, (Energy Using Products).

Ecodesign requirements for fluorescent lamps without integrated ballast, for high intensity discharge lamps, and for ballasts and luminaires able to operate such lamps.
Product information requirements on luminaires for fluorescent lamps with a total lumen output > 2000 lumen, EU regulation No 245/2009.

Luminaires with ballast

All our luminaires with HF-ballast are equipped with ballasts that fulfill at least energy efficiency index (EEI), classification A2 for HF-std and A1 for HF-DIM.

All our luminaires with conventional ballast are equipped with ballasts that fulfill energy efficiency index (EEI), classification B1 or B2.

Lightsources

The type of lamps compatible with a luminaire is shown with ILCOS and ZVEI codes at the web page for product information. The lamp efficacy in lm/W is shown at the web page for product information below accessories/lightsources.

Instructions for maintenance

These are included in the "Instruction for use" that can be found at the web page for product information.

Disassembly instructions

These are included in the "Instruction for use" that can be found at the web page for product information.

For detailed information about a specific luminaire please contact Ateljé Lyktan AB, info@ateljje-lyktan.se or tel: +46 (0)44-28 98 00.
